The Rules and Bylaws Committee of the Lone Star Groundwater Conservation District is hosting a public workshop dedicated to receiving public input on the pending proposed amendments to the District Rules and District Regulatory Plan. Public hearings were held on the proposed amendments in conjunction with the October, November, and December 2014, and January 2015, regular board meetings of the District's board of directors. A public workshop was also held on the proposed amendments on November 18, 2014. Based upon feedback received from the public, the committee is not interested in receiving further input at this time on the water well spacing and minimum tract size requirements included in the previously proposed amendments to the District Rules. It will be the committee's recommendation to table further consideration of those until after the proposed amendments to the District Regulatory Plan and the few remaining amendments (other than well spacing and tract size requirements) to the District Rules have been finalized.

This workshop will be held on Wednesday, January 28, 2015, beginning at 3:30 p.m. or upon adjournment of the 2:00 p.m. workshop of the District's Findings and Review Committee, whichever is later, at 655 Conroe Park North Drive, Conroe, Texas.
