2025 Enforcement Overproduction Disincentive Penalty Tiers

Factors for Penalty Consideration

After review of the violation(s) and taking into consideration various factors in Rule 12.8(c) (e.g., compliance history, efforts to correct the violation, penalty amount necessary to deter future noncompliance), penalty reductions were applied universally through a tiered system described below.

2025 Enforcement Penalties

Tier	Penalty per 1000 gallons	Conditions
1	$1.00	First Time Overproduction **AND** application accepted before overproduction of permit.
2	$2.00	First Time Overproduction, no application accepted before overproduction of permit. **OR** Second Time Overproduction **AND** application accepted before overproduction of permit.
3	$2.50	Second Time Overproduction, no application accepted before overproduction of permit.
4	$3.00	Third Time Overproduction **AND** application accepted before overproduction of permit.
5	$3.50	Habitual Overproduction of Permit

Additional Information:

- Incomplete applications are not considered accepted by the District.
- An application "accepted" by the district means an application that is not missing any information, is complete, and has been accepted for technical review.
- Habitual Overproduction is defined as three or more overproduction violations, and no application accepted before overproduction of permit.
- Date of overproduction based on meter readings submitted to District for 2025.
- Enforcements for 2025 overproduction will be issued tentatively on April 1, 2026.
